- 18 RESEARCH PLUS**  
 Our compendium of published evidence on occupational health
- 20 LEGAL TABLE**  
**OH legal and practice update 2014**  
 The 10th *Occupational Health [at Work]* legal and practice update provides a unique and comprehensive guide to recent, scheduled and expected changes to the law, codes of practice and official guidance in occupational health, health and safety, disability and professional practice. Among the domestic highlights is the introduction, later this year, of tax exemption of up to £500 a year per employee for medical treatments recommended by the Health and Work Service or an employer-arranged OH service. Another significant change is the lifting, from April, of the ban on healthcare workers with HIV being able to carry out certain dental and surgical procedures. New or revised European legislation to look out for includes: a proposed Regulation on data protection; a directive on the posting of workers; and amendments to the directive on measures to encourage improvements in the health and safety of pregnant workers.
