- 13 FEATURE**
Taking the chequered flag
 Built around the biopsychosocial model of recovery and return to work, ‘flags’ are commonly used to denote risk factors in musculoskeletal and other common health problems. Dr Jim Ford explains what they are and how they can be used to overcome barriers to return to work.
- 19 FEATURE**
A changing climate for health
 Climatologists believe the world will be 2°C hotter in 2050 than in pre-industrial times. A hotter planet will present occupational health professionals with significant challenges. Paul Suff looks at how climate change could affect workers’ health.
- 24 FEATURE**
Accessing health information
 Part II of John Ballard’s examination of pre-employment health screening in the UK asks a panel of OH and HR professionals how useful such vetting is and whether the UK law needs to change to protect disabled people from discrimination at recruitment.
- 29 PERSONAL INSIGHT**
HIV-positive and fit to practise
 An HIV-positive doctor working in the NHS gives a personal account of his experience after being diagnosed and the role occupational health played in supporting him at work.
- 32 EXPERT WITNESS**
Medical research
 Our legal expert Diana Kloss warns occupational health practitioners and researchers of the need to be aware both of the legal and ethical principles that must be adhered to when conducting research.
