11.15	<u>Role of OH technicians and nurses:</u> <ul style="list-style-type: none">• Responsibility of senior OH practitioner• Process of delegation, audit and quality assurance• Communicating findings of delegated assessments	16.00	<u>Optional test: See how much you know!</u>
		16.30	<u>End of day</u>

A certificate of attendance will be provided and an optional theoretical assessment will be undertaken at the end of the training to consolidate your learning from the day.

(Please note that neither of these will replace the need for an employer to have an appropriate system of delegated responsibility in place.)

It should be noted that this course is intended to provide background knowledge and all those who undertake delegated tasks for HAVS surveillance are required to comply with HSE recommendations regarding their role.

Receive detailed printed documentation

All delegates will receive printed documentation plus a FREE copy of *Hand-arm vibration syndrome: a guide for occupational health practitioners* by Dr. Roger Cooke.

Hand-Arm Vibration Syndrome for Occupational Health Technicians & Nurses

Hand–arm vibration syndrome (HAVS) is a significant occupational disease. In the UK alone, there are over 250,000 sufferers.

This one-day training course provides a solid introduction and significant background knowledge on HAVS to assist OH technicians, and screening nurses in their role undertaking delegated tasks for statutory health surveillance. The day will feature practical training on specific clinical assessments.

Who is the training designed for?

This training is designed for OH technicians and screening nurses that are new to HAVS (little or no experience). Previous experience of HAVS is not essential, but experience in OH is required.

The training is also likely to be of assistance to any OH nurses, who lack any prior knowledge of HAVs, and are considering taking the Faculty in Occupational Medicine Certificate in Hand-Arm Vibration Syndrome qualification. It will provide an

introduction to, and understanding of the topic, which will be built on during the Certificate course.

How will attending this training benefit you?

You will gain:

- Detailed background knowledge of hand transmitted vibration, its health effects and symptoms
- An understanding of your role in undertaking delegated tasks for statutory health surveillance at Tiers 1, 2 or 3, and how you can work under supervision to assist suitably qualified occupational health staff
- Comprehension of the legal requirements relevant for workers exposed to hand transmitted vibration
- Hands on, practical experience of how to conduct different assessments for HAVs
- Improved confidence in your HAVS knowledge and skills

Delegates at a recent course said:

“A very worthwhile day, providing informative and relevant content, delivered in an interesting way that will enhance practice.”

Joanne Glasspool, OH nurse, Powys Teaching Health Board

“Fantastic course for those wanting to gain some basic knowledge around HAVS.”

Jennifer Stanley, OH technician, Tyne and Wear Fire and Rescue Service

About our expert tutors

Dr Roger Cooke is a consultant in occupational medicine. His experience and interest in vibration-related disease extends over 40 years, including clinical practice, teaching, advising industry and specialist groups, writing on the subject and acting as expert witness in legal proceedings. He is the author of the book, *Hand–arm vibration syndrome: a guide for occupational health practitioners*, published by The At Work Partnership in 2020.

Two other expert tutors, **Andrew Cooke**, clinical director at Clarity Healthcare and **Dr Bernard Yew**, medical director, PAM Group, lead the group work and practical sessions.

ADMINISTRATION

Format: The training will be delivered face-to-face at a venue in Birmingham. Details of the venue will be sent in your administration details..

Bookings: Places are limited. Documentation, refreshments and a buffet lunch are all included in the price. In cases where your paperwork may take time to reach us, please contact us to reserve a no-obligation provisional place.

To process your order, we keep your details securely on our database and we NEVER pass on your details to 3rd parties. At the time of booking, you will be given options to choose your preferred methods of communication with The At Work Partnership.

Event administration details: Please contact us if you do not receive written confirmation of your booking within two weeks of making the reservation. Details of the venue, a map and any final information will be sent to paid delegates approximately two weeks before the event. If you have not received these one week before the event, please contact us.

Cancellation policy: For cancellations received in writing 14 days before the workshop, we will provide a refund, less a 25% administration fee. If the cancellation is received within 14 days of the workshop, no refund will be made, but we will accept an alternative delegate. Refunds are not available to delegates who fail to attend after confirming a booking.

Special requirements: If you have any special needs, please let us know in advance and we will be delighted to try and help.

This programme was correct at time of going to press. In unavoidable circumstances, we reserve the right to change or cancel this event. If we do need to cancel this event, our liability is limited to a refund of fees
